Attention:

### **Marsh Landing (Pool and Clubhouse)**

Pesky Varmints will be completing a Cane Toad Control Visit for your Association on the following night;

**Wednesday, September 9<sup>th</sup> going into Thursday, September 10<sup>th</sup>**

**There is no action needed from you, this is just to notify the community that there will be a crew on site during the nighttime hours anytime between 10 PM and 5 AM on the above mentioned date.** They will have flashlights on, pointed towards the ground, and will be checking the property around the pool and clubhouse to remove the pesky Cane Toads. The crew will be identified with yellow safety vests. They will be quiet and discreet so they do not disturb the neighborhood.

**\*This visit is for the removal of the invasive, poisonous Cane toad only. All other native toads and/or tree frogs are not part of the removal process.**
